

Drum Lifter

Salvage Drum Lifters

For use with closed head steel drums for fast and gentle loading of steel drums into overpacks

Open Head Drum Lifter

Quick and easy attachment and removal. Allows the drum lid to be re-used in most cases and works on closed head drums. Suitable for use with standard steel or poly drums with at least a 3/16" chime. Lifting arms are adjustable to work with most 55 or 30 gallon drums. Three-point contact of the lifting arms prevents or minimizes deformation of the drum while providing proper alignment of the drum rim to the lifting arm for more secure lifting.

Hoist Mount Drum Lifter

Heavy duty annealed ductile iron with curved foot on stabilizing arm prevents damage.

Drum Caddy

Transport (1) 55 or 30 gallon drum or (2) 5 gallon pails. Align unit in front of drum, remove handle and tip drum up while guiding the caddy base under the drum, re-attach handle. Unit rolls easily and comes with one 3" x 1" swivel caster. The removable handle doubles as a bung nut wrench and seal remover. Cradle height is 1/2". Inside cradle diameter is 23 1/2". Steel construction. Yellow painted finish.

Drum Forks

This gripper makes it easy to pick up one or two steel drums without leaving the seat of the fork truck. The knuckle gripping system grips tightly for lifting. Drum is automatically released by lowering the forks. All models feature hinged folding design for storage. Models DGS-A and DGD-A feature adjustable-width arms for use with both 30-gallon and 55-gallon steel drums. Welded steel construction. Powder coat finish.
