

Liners and Elastic Covers

Pail and drum liners are the practical and inexpensive way to protect your products from outside elements. Liners safeguard your products with our round bottom, antistatic, for flammable items and polypropylene or hot fill materials drum liners. Round bottom drum liners have capacities ranging from 5 through 55 gallons and come in numerous sizes and thicknesses. All of our drum and pail liners meet FDA requirements.

Round bottom drum and pail liners

Flexible liners that evenly distribute weight, designed with a 360° shape. Antistatic liners for flammable materials, reducing the static charge and polypropylene - hot-fill products at temperatures up to 360° Fahrenheit.

Rigid Liners

Choose from a large selection of seamless high-density and low-density polyethylene rigid drum and pail inserts. Liners allow for a cleaner environment when processing any product. Disposing of materials is also easier. Used mostly for storing paints, inks, coatings, food and cosmetic products.

Salvage Liners

Keep your drums clean and ensure product recovery with these 85 gallon drum bags for wet and dry materials. Flat Bottom - High-quality flat bottom drum bags and liners ranging in sizes from 36 x 60 to 38 x 65.

Dust and Drum Covers

Polyethylene elastic drum covers, dust covers and top sheets protect protect foods, chemicals, pharmaceuticals, and other products from outside contaminants such as water, grease and dust. Available in tight fitting elastic sewn drum and dust covers, as well as square and round top sheets. Poly covers come in various thicknesses and have capacities ranging from 5 through 55 gallons. Custom size drum covers and top sheets are also available.
