

Bucket Opener

The bucket opener opens and re-seals 2-5 gallon plastic pails. Simply place the upper hook under the rim of the lid and push down on the handle. Continue this action around the rim and pull the lid off. Re-seal the lid by using the built-in hammer.

Lid Cutter

Aluminum Lid Cutter™ cuts, opens, and re-seals 3 - 5 gallon plastic containers. To cut slotted covers safely, place the cutter-head in the notch of lid and push handle down. Lid opens easily by inserting tool heel under rim and pulling handle up and repeating around cover edge. Use hammer to re-seal lid.

Seals

Heavy duty, high-density polyethylene construction creates a leak-proof airtight seal. Tap on the adapter ring and screw inner cover on. Material meets FDA standards

Heavy Duty Plastic Drum Covers

These rigid, tough polyethylene covers for steel, plastic or fiber drums are one-piece molded with no seam or joints to catch dirt or harbor bacteria. Covers are completely flat across the top with a 1 1/2" protective flange. Fits open-head drums with covers removed or tight-head drums.

- Covers are loose fitting
- Seamless polyethylene
- FDA compliant material
