

# Salvage Ring Closures

---

## Lever-Lock Ring Closure - unlined

If you need to contain leaking or damaged storage drums, we offer a variety of sizes to match your drum needs. Available with either bolt & nut ring or our labor-saving lever lock ring for fast and easy opening and re-closing with out tools. Quick Lever Closure Ring is now offered on all drums (except 96 - and 110 - gallon sizes). The durable steel drums comply with 49 CFR 173.3(c). A compatible sorbent such as vermiculite (sold separately) may be used to help comply with salvage drum requirements.

All quick lever closures meet UN requirements. Corrosion-resistant epoxy lining also available. Each steel drum has one multilingual salvage drum label. "T" certified steel drums available upon request. Overnight service available. We offer a wide selection of salvage drums and overpacks.

## Standard Bolt Ring Closure

The bolt ring closure is offered on all steel drums. These heavy-duty, UN certified salvage drums comply with 49 CFR 173.3(c). The bolt ring closure standard drums feature 12-gauge bolt rings and rubber gaskets, except 8 - and 10 - gallon, which have a 13-gauge bolt ring. The rubber gaskets are EPDM and resist most chemicals. Corrosion-resistant epoxy lining is also available. Each salvage drum has one multilingual salvage drum label. "T" certified steel drums available upon request. Overnight service available for salvage drums and overpack.
