DOT CLOSURE INSTRUCTIONS HEDWIN 6 GALLON AND LESS RECTANGULAR WINPAK® CONTAINERS

WINPAK® containers are self supporting, rectangular polyethylene containers designed for use in the transportation and storage of a wide variety of LIQUID products including hazardous chemicals. It is the shipper’s responsibility to determine if their chemical is allowed for shipment in the WINPAK® container as well as determine if the product is compatible with polyethylene.

WINPAK® containers are tested for compliance with the requirements of 49 CFR para. 178.600 and the containers carry the following marks:

\[ \text{3H1/Y1.8/100/YR}^* \text{ USA/M}^{**} \text{ 1.1mm} \]

\[ \text{3H1/Y1.3/100/YR}^* \text{ USA/M}^{**} \text{ 1.1mm} \]

*year of manufacture
**M number

1.3 mark is authorized for vented 70mm screwcaps. Specific gravity of lading cannot exceed 1.3.

CLOSURE REQUIREMENTS

The container must be closed for shipment as listed below. Use of nonspecified components will lead to non conformance with DOT marks. If you are not the final assembler of the WINPAK® container, you are required to transfer this information to the party who will complete assembly of this package in accordance with 49 CFR para. 178.2.
